

WEDNESDAY, MARCH 30, 2011

09:00-12:00 EASL-IAC (International Club of Ascites) Joint Workshop:

RENAL DYSFUNCTION IN CIRRHOSIS IN THE ERA OF AKI: TOWARDS A NEW DEFINITION

Chairs: **M. Bernardi**, Italy
P. Angeli, Italy

09:00 Introduction:

Renal dysfunction in patients with cirrhosis: the long way traveled so far by hepatologists
V. Arroyo, Spain

Critical points in the actual definitions of renal dysfunction in cirrhosis

09:15 The definition of renal dysfunction in cirrhosis in the era of AKI ; is a 0.3 mg/dl change enough in the setting of cirrhosis for diagnosis of AKI?
M. Nadim, USA

09:30 The actual "grey zones" about the classification of patients with cirrhosis and renal dysfunction.
F. Wong, Canada

09:45 How to improve the differential diagnosis among HRS and ATN?
C. Parikh, USA

10:00 Discussion
S. Møller, Denmark
C.L. Davis, USA

Critical points in the treatment of renal dysfunction in cirrhosis

10:15 How to optimize the pharmacological treatment for type 1 HRS
A.J. Sanyal, USA

10:30 Coffee Break

11:00 What after the failure of vasoconstrictors and albumin in order to be effective and to avoid futility? Extracorporeal renal and/or hepatic support, TIPS
F. Salerno, Italy

11:15 Combined liver and kidney transplantation (CLKT): when is it indicated in patients with cirrhosis and renal dysfunction?
C.L. Davis, USA

11:30 Discussion
M. Guevara, Spain
M. Nadim, USA

11:45 **Conclusions:**
Proposal of a new classification of renal dysfunction in patients with cirrhosis: towards a consensus based on a multidisciplinary approach ?
P. Ginès, Spain
